

## Because There's No Place Like Home.

*Studies show that patients often recover more quickly at home. That's because they can receive care in a familiar, comfortable environment with loved ones nearby – without the disruption of traveling to the hospital for therapy or other treatments. With HomePoint Health Services, you will have the same quality and resources of the hospital available to you at home. And you can be confident that our professional clinicians are qualified to care for you and your loved ones as we have met the national quality standard set by The Joint Commission.*

# Home Health Services

## Our Home Health Services are Available 24 Hours a Day

**Registered Nurses** provide skilled nursing care in the comfort of your own home and may provide the following:

- Wound Care – including wound vac
- IV Therapy
- Post-hospitalization

**Certified Nurse Aides** are trained in daily activities such as bathing, dressing, personal hygiene and oral care, under the supervision of a registered nurse.

**Physical Therapists** include evaluation, treatment and instruction for those patients whose mobility has been compromised. Education in equipment use, exercises and home safety are provided to the patient and caregivers to help the patient live as independently as possible.

**Occupational Therapists** help individuals achieve independence despite disabilities. Evaluation, treatment and instruction in daily living activities are provided.

**Speech Pathologists** include instruction in skills needed to improve the patient's speech, language and memory function as well as safe swallowing techniques.

**Social Workers** are available to address the social or emotional needs identified by the patient, their family, their physician and Home Health Services team.

## Am I eligible for Home Health Services?

Our services are available to anyone in need of healthcare at home for an acute or chronic medical condition. Home Health Care is prescribed and directed by the patient's physician. Hospitalization is not required prior to receiving services.

## How will I pay for Home Health Services?

Our home care services are a cost-effective alternative to a lengthy hospital stay. For those patients who meet criteria, many insurance companies including Medicare and Medicaid offer extensive home care benefits to their subscribers. Eligibility and payment programs vary with coverage.

## What Do I Do Next?

A referral may be made by your doctor, hospital, nursing home or other patient service agency. A free admission screening can be arranged to determine whether home care is appropriate. Screenings can be performed in the hospital, at a long-term care facility or in your home. HomePoint Health Services will work with you, your family, and your physician to develop a healthcare plan designed especially for you.
